Annotations:

- Request line** contains all the information that is available in the Results section. The information may be used in a report, pivot or the item may be necessary for a calculated field. The items are added to the Results section by dragging them from the tables.
- Limit line** tells the data warehouse how to narrow down the vast amounts of data that are currently in the Financial Data Warehouse. The items are dragged from the tables into the limit line.
- Drag it and drop it into either the Limit line and/or Request line.
- Once you add an item to the request line you must **Process** the report or you will not see the item in the Results Section.
- <Click> on an item in a table.

Query Section

Introduction to the Query Section

3/8/04

The screenshot shows the BrioQuery application window titled "BrioQuery - 34dtr[2].bqv". The interface includes a menu bar (File, Edit, View, Insert, Format, Query, DataModel, Tools, Window, Help) and a toolbar. The main workspace is divided into several sections:

- Sections Panel (Left):** Contains toggle buttons for "DTR", "Query" (which is highlighted with a circle), and "Results". A callout box explains that these buttons facilitate movement between different sections of a Brio report.
- Request Line:** A horizontal bar at the top containing fields like "Begin Budget Fy", "Fiscal Year", "Fiscal Month", "Fund", "Division", "Organization", "Reporting Org 1", "Reporting Org 2", "Program", "Boc", and "Transaction Code". A callout box indicates that "Request, Sort, and Limits" toggle buttons make these sections appear and disappear.
- Sort Line:** A horizontal bar below the Request line containing fields like "Begin Budget Fy", "Fiscal Year", "Fiscal Month", "Fund", "Division", "Reporting Org 1", "Reporting Org 2", "Organization", "Program", "Boc", and "Document Date".
- Limit Line:** A horizontal bar below the Sort line containing fields like "Fiscal Year V(1)", "AND", "Fiscal Month V(2)", "AND", "Transaction Code", "AND", "Reporting Org 1 V(3)", "AND", "Reporting Org 2 V(4)", "AND", "Orga".
- Tables Panel (Bottom Left):** Lists various tables including "Tvend", "Torgn", "Vgenledg" (the center table), "Tfund", "Tdvsn", and "Taprd". Each table has a list of fields. A callout box explains that the "Center table" (starting with V) is the first to look at for bringing items into the limit line or results section.
- Tables Panel (Bottom Right):** Lists fields from the Financial Data Warehouse, including "Fiscal Year", "Fiscal Month", "Fiscal Month Name", "Fisc Month End D", and "Closed Period Ind". A callout box explains that these items can be pulled into the Request or Limit line to change the report.

At the bottom of the window, there is a status bar showing "No Results Yet" and "Combined View: 6 topics".

Request, Sort, and Limits toggle buttons make the corresponding sections appear and reappear depending on your need for viewing or working on certain sections. These toggle buttons also show you how many items you have in the Request, Limits and Sort lines.

Sections are toggle buttons that facilitate the movement between different sections of a Brio report. Sections include Query, Results, Report, Pivot, Charts and Tables. In this example the Query toggle Button is activated.

T tables also have items that are useful in your report. Use these items when they are not available in the V tables.

The **Center table** or the one that begins with a **V**, is the first table to look at to bring items into the limit line or into the results section.

These are the tables in the Financial Data Warehouse. Pull these items into the Request line or the Limit line to change your report.
